COVID-19: Risk of Transmission

Wessex Chiropractic operates with very strict hygiene and sanitation protocols in place to protect our patients. Despite these precautions, there is an inherent risk of human-to-human transmission of the Coronavirus (COVID-19). For details of our hygiene and sanitation protocols, please speak to the Sally Mathews.

We have requested any symptomatic patients to stay away from the clinic at this time.

Whilst Wessex Chiropractic has taken every further precaution to limit your risk of exposure to Coronavirus, we cannot guarantee that there is no risk to you as a result of attending the clinic and/or receiving treatment.

How does Coronavirus Spread?

This virus appears to be spreading easily, and is thought to spread mainly from person-to person through people who are in close contact with one another (within about 6 feet) or through respiratory droplets produced when an infected person coughs or sneezes.

Whilst it is currently thought that people are most contagious when they are most symptomatic, it is possible some spread might be possible before people show symptoms.

If you are in the "at risk" group

If you are:

- Pregnant
- Over 70
- Have a long term health condition or;
- Have a weakened immune system

You are strongly advised not to receive care at this time.

Consent to receive care

- I understand that there is a risk of transmission of Coronavirus (COVID-19) as a result of attending the clinic and/or receiving treatment.
- I understand that Wessex Chiropractic cannot accept responsibility for transmission of the Coronavirus (COVID-19) should I become infected.
- I have had the chance to ask all the questions I wish to at this time.

By signing the above, I consent that I have read, agreed to and understood the statements above and consent to receive care at Wessex Chiropractic.
